About Me

I am curious and passionate to learn new things on tech and software development. Daily I am stretching my skills on Frontend Development. Solving problems at all levels of difficulty is the way how I challenge my brain every day

Skills

Technical – React, JavaScript, HTML, CSS, SASS, LESS, jQuery, TypeScript, NextJS, Redux Toolkit, Node.js, NPM, Git, Figma

Languages – Azerbaijani(native), English(intermediate), Russian(intermediate)

Other - Googling, Problem-Solving, Teamwork, Agile/Scrum

Work Experience

Replenishment Specialist

Tuk-Tuk LLC

May, 2020 - May, 2022

- Analyzing sales data regularly to make clear predictions for ordering supplies when they run low.
- Build a replenishment strategy by reviewing sales, weather trends and increase or decrease inventory levels based on sales forecasts.
- Processing and organizing shipments among stores.
- Develop reporting tools; monitor and adjust reporting parameters throughout the season.

Projects

IT Jobs Aggregator web app ([azjobit.netlify.app](#))

- Built a web app that will help people to find job listings in IT sector.
- Wrote automated scraping program that gets job listings from 4+ websites.
- Tools used: HTML, CSS, Javascript, Cheerio JS, React JS, Axios, Moment JS

Kanban web app ([mbreactkanban.netlify.app](#))

- Built a website for task management
- Implemented state persistence using browser localStorage
- Tools used: HTML, CSS, Javascript, Vite, React, React Beautiful DND, Redux-Toolkit, Redux-Persist

Weather web app ([bmweatherapp.netlify.app](#))

- Created responsive app where you can get weather information based on coordinates.
- Tools used: HTML, SCSS, TypeScript, Angular, Open-Meteo API
